Career summary so far

Results-oriented and adaptable Software Engineer with 5+ years of hands-on experience in designing, developing, and maintaining scalable solutions. Proficient in Golang, Node.js, NoSQL, Python, and AWS services, I have a proven track record of delivering high-quality code and contributing to the success of cross-functional teams. I am passionate about staying updated with the latest technologies and best practices in software development. Eager to bring my technical skills and collaborative mindset to a dynamic team where I can contribute to innovative projects and drive success.

Experience

Keenai Global

Aug 2025 – Present

Senior Associate Product Engineering

Bangalore, India

- **Built Price Hierarchy** which drives which price should be applied for valuation, reduced recon breaks by **20%**.
- **Built Portfolio Versioning** for pulse platform service with scale of 100K+ transactions per family offices.
- **Built generic events** service from scratch to handle organization wide domain events for async processing.
- **Built Order management service** for order placement for stocks and ETFs for multiple exchanges (US, Singapore, etc).
- **Built portfolio module** for wealth product supporting - metrics, orders, reports, allocations, etc.
- **Built portfolio module** for wealth product supporting - metrics, orders, reports, allocations, etc.
- Tech-Stack: Nodejs, Golang, Python, MongoDB

Razorpay

Sept 2024 – Aug 2025

Senior Software Engineer

Bangalore, India

- **Built GenAI-based Chatbot** application for providing smooth merchant onboarding experience, achieving a **70% containment rate** in supported use cases.
 - * Used **RAG + LLM-based approach** for efficient intent identification
 - * Onboarded pre-activation use cases for merchant onboarding by defining the **detailed SOPs**
 - * Implemented functional and non-functional metrics for high observability.
- **Building GenAI-based** application to automate the resolution of merchant-raised support tickets which is **reducing human agent costs by 50L per month..**
 - * Onboarded critical use cases with high influx which drives 85-100 ticket resolutions per day.
 - * Driving the CSAT (Customer Satisfaction) improvements for maintaining the high-quality support ticket resolution
- **Mentoring and leading a team of 5 engineers** for fast and efficient onboarding of use cases.
- **Driving the Opex (Operation Excellence)** for ensuring availability and efficiency of the system.
- **Collaborating with the cross-functional and non-functional teams** to automate the use cases and resolving bottlenecks.
- Tech-Stack: Python (FastAPI, Streamlit, Celery), Others: LLM (OpenAI), RAG, N8N, MCP

Smallcase

March 2022 – Sept 2024

SDE II

Bangalore, India

- Built Investment Alerting from scratch for stock-related alerts (dividends, corp actions, price-based triggers, etc.) to enable **5M total users** and **1M active users** to efficiently take decisions based on movements.
 - * Provides quick heads-up before stock market opens for recent fundamental actions expected to occur for stocks.
 - * Triggers Price movement alerts during the stock market hours to the investors to take actions immediately.
 - * Summarizes portfolio performance and triggered fundamental actions for associated stocks at the end of the day.
- Built a **robust Platform-as-a-Service (PaaS)** from scratch to handle different types of payments (One-time, Subscription-based payments, Token-based payments) from multiple **Payment Gateways** (Razorpay, Apple In-App Purchase, Juspay, Zerodha) which handles **1.5M\$ transactions** per year.
 - * Built token-based recurring payments setup for enabling Digital gold transactions. (Razorpay, Juspay)

- * Built subscription based payment setup for handling recurring payments for platform membership. (Razorpay, Apple IAP)
- Built **fault-tolerant** transaction flows for legacy transactions with Zerodha.
- **Revamped offer engine** for digital gold and platform membership purchase.
- Tech-Stack: Golang, Nodejs (NestJS), MongoDB, AWS

Zopsmart

Jan 2021 – Feb 2022

SDE I

Bangalore, India

- Built **custom language framework** for the application (Web/CMD) development in Golang.
- Implemented generic interfaces for PubSub (Amazon SNS), Custom Metrics (using Prometheus), AWS services, etc.
- Built **custom authentication mechanism CSP(Credential Service Provider)** for inter-service communication.
- Delivered end-to-end API functionalities for Marketplace application.

Education

G H Patel College Of Engineering And Technology

Aug 2017 – May 2021

BE in Computer Engineering, CGPA 8.22/10

Skills

- **Languages:** Golang, Javascript, Python
- **Protocols:** REST, GRPC, MCP
- **Frameworks:** Gofiber, Express, NestJS
- **Databases:** NoSQL (MongoDB), SQL (MySQL), Key-Value (Redis)
- **Others:** NodeJS, AWS Services (EC2, S3, Lambda, etc.), Docker, Kafka, Postman, Git, N8N, etc.

Certifications

- **AWS Certified Cloud Practitioner**
- **AWS Partner Accreditation**
